The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/511,919	Applicant(s) YAMAGUCHI, TAKASHI	
	Examiner Urszula M. Cegielnik	Art Unit 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beny et al. (US Patent No. 3,608,236) in view of Tilbor et al. (US Patent No. 6,024,627).

Beny et al. disclose a pair of left and right driven (directed to intended use) wheels; a pair of left and right steered wheels; and a steered wheel-supporting mechanism which supports the steered wheels such that each steered wheel is adapted to turn around a predetermined steering axis and such that the steered wheels are adapted to turn in the same direction in association with each other, wherein the steering axis is inclined with respect to a vertical direction such that an upper portion of the steering axis is located rearward of a lower portion of the steering axis in a traveling direction, and wherein the steered wheel-supporting mechanism is further configured such that, when a speed difference is generated between the driven wheels to turn the automobile model in a turning direction, the steered wheels are naturally steered in the turning direction without any additional steering driving force by a reaction force received from a

ground-contact surface; the steering axis with respect to the vertical direction (straight or neutral position) is in the range of 20 to 40 degrees (+- 20) (col. 3, lines 42-47).

Beny et al. does not explicitly disclose the left and right driven wheels being independently driven by different driving sources.

Tilbor et al. teach a toy vehicle having a pair of left and right driven wheels being independently driven by different driving sources (col. 3, lines 66-67 through col. 4, lines 1-2).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the pair of left and right driven wheels being independently driven by different driving sources as taught by Tilbor et al., since Beny states that the steering arrangement may be applied also powered toy vehicles (col. 2, lines 17-23).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Urszula M. Cegielnik whose telephone number is 571-272-4420. The examiner can normally be reached on Monday through Friday, from 5:45AM-2:15PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eugene L. Kim can be reached on 571-272-4463. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
